Aegis

SCHOOL OF BUSINESS
SCHOOL OF TELECOMMUNICATION

'You can work on the world's most important problems, with access everywhere in the world to everything'

- Virginia Rometty, CEO 

Aegis

RESEARCH INSTITUTE FOR INNOVATION & ENTREPRENEURSHIP

The world is mobile.

The mobile ecosystem continues to expand at warp speed.

Enterprise Mobility must be defined as business critical, as it is changing the way of doing business.

It is now vital to be able to handle critical tasks and make informed decisions in real time and space.

Anticipating the rising demand for educated professionals, Aegis School of Business & Telecommunication, with the support of CanvasM and Adobe, has launched the World's First Master's Program in Enterprise Mobility.

WORLD'S FIRST PGP IN ENTERPRISE MOBILITY

Full Time Program
Part Time Executive Program
Graduate Certificate Course
Conferences
Customized Corporate Programs

11 Months, 36 Credit Units

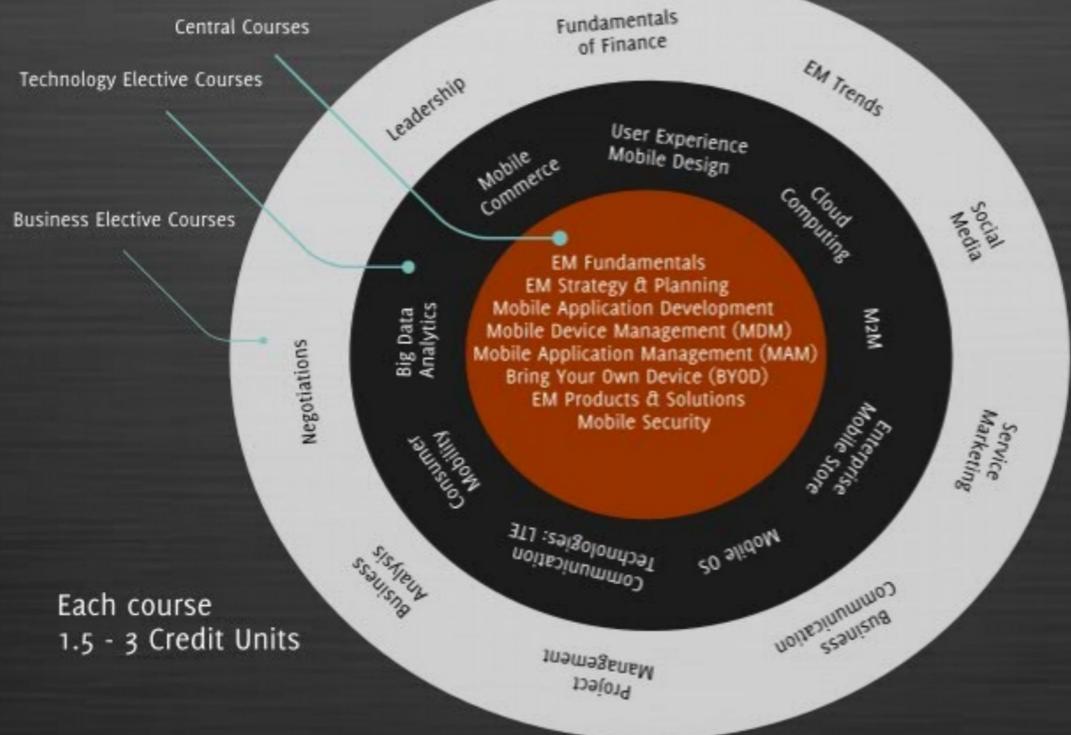

11 Months, 36 Credit Units

3 Months, 21 Credit Units

Aegis Enterprise Mobility programs are designed to provide students with the knowledge of the latest advancement of mobility in the workplace and to enable them independently identify risks and benefits of Enterprise Mobility and implement this information to the advantage of an organisation.

The students will also be educated on what is currently happening in the global technology market.

Each course
1.5 - 3 Credit Units

The Programs' framework offers students the flexibility to build their own curriculum and choose a direction in Technology, Management, or Techno-Management.

Enterprise Mobility enables workforce to have instant access to information through mobile applications anywhere, anytime. People are fundamentally changing the way they work, and in order to remain competitive, organisations are making enterprise applications accessible through mobile devices.

Why Enterprise Mobility?

Benefits of Enterprise Mobility span the Business-to-Employee (B2E), Business-to-Business (B2B), and Business-to-Consumer (B2C) spectrums. Enterprise Mobility can improve an organisation's productivity, optimize logistics operations, enhance customer relationships and streamline supply chain management.
